After choosing the signup option you will need to input your name, email, and a password you would like to use for the account(password must be 6 characters long). After filling in the fields you click the signup up button again

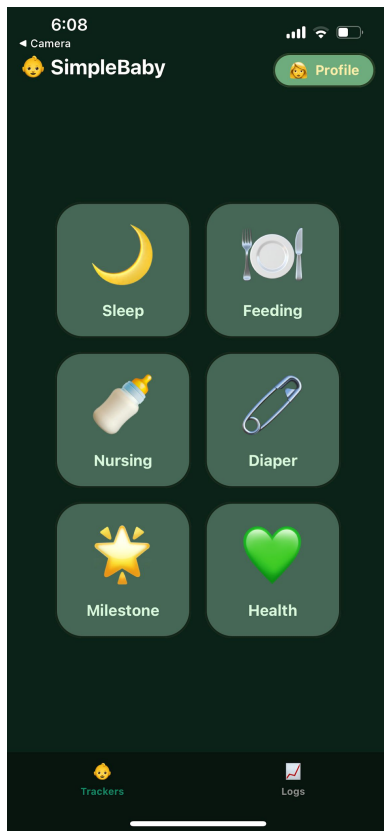

Setup:

At this point you have reached the last part of setting up simpleBaby. All there's left is for you to enter your child's name and click the button below.

Recording a log

Recording logs:

After setting up you should see the following screen that also acts as a home page. All the icons represent different things that you can track. The different things that they track can be identified by the symbols.

Recording logs:

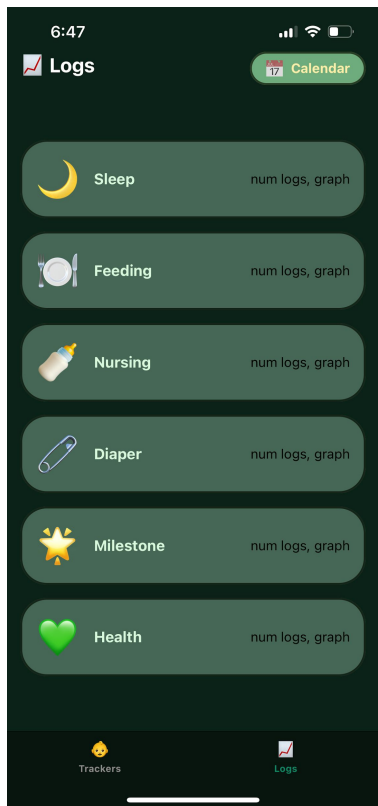

The screenshot shows the 'Sleep Tracker' app interface. At the top, the status bar displays the time 6:42, signal strength, Wi-Fi, and battery icons. Below the status bar is a 'Back' button and the title 'Sleep Tracker'. The main section is titled 'Stopwatch' and features a large digital timer showing '00:00:00' with 'h', 'm', and 's' indicators. Below the timer are three circular buttons: 'START' (green), 'STOP' (yellow), and 'RESET' (pink). The 'Manual Entry' section below has two rows: 'Start Time' and 'End Time', each with a 'Choose' button and a clock icon, both showing '6:42 PM'. At the bottom of the manual entry section is a text input field labeled 'Add a note' with the placeholder text 'i.e. baby was squirming often'. At the very bottom of the screen are two buttons: '+ Add to log' (pink) and 'Reset fields' (pink with a trash icon).

After choosing what you want to track please click the button with the corresponding icon. and you will be taken to the actual tracking page for that feature which can be seen below. From there fill in the fields and then click the add to log button in the bottom left corner.

Also if you look at the bottom right corner you can see there is a reset button as well if you start the log over. After clicking the add log button the log will be saved.

Viewing logs

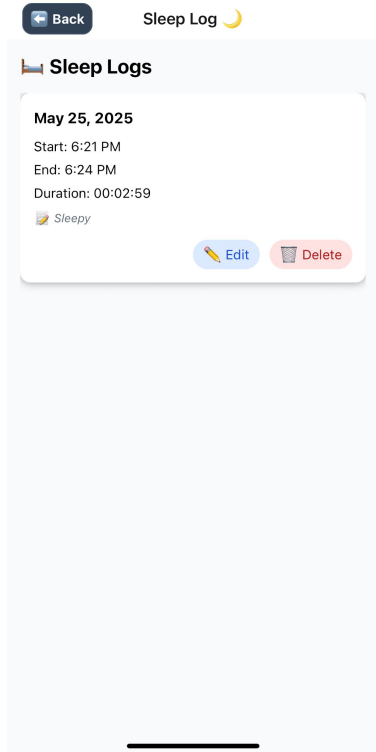

Recording logs:

If you look at the image of the home page again you can see that we are once again on the home page. If you look at the button you can see that there is a logs button. If you click that you will be taken to the log section which looks like the image below. From there click the kind of logs you are looking for and then click on it.

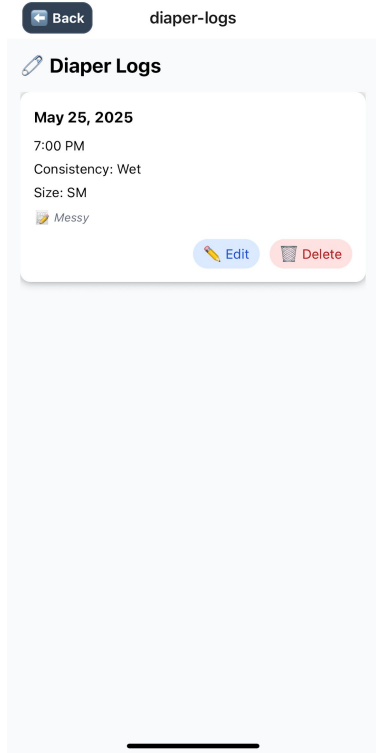

Recording logs:

After clicking you will be brought to this page. If no logs have been made yet the page will appear as empty but as you can see since we already made a log one appears with the information that we imputed.

Editing/Deleting log

Editing/deleting logs:

Once on the log page(if you don't know how to get here view last section). You will see two buttons the first one is editing. If you wish to edit the log click that button.

Cancel Save

After clicking the edit button the screen will look like the image. By clicking on any of the fields the keyboard will appear and you can change the contents of the field. After changing click save.

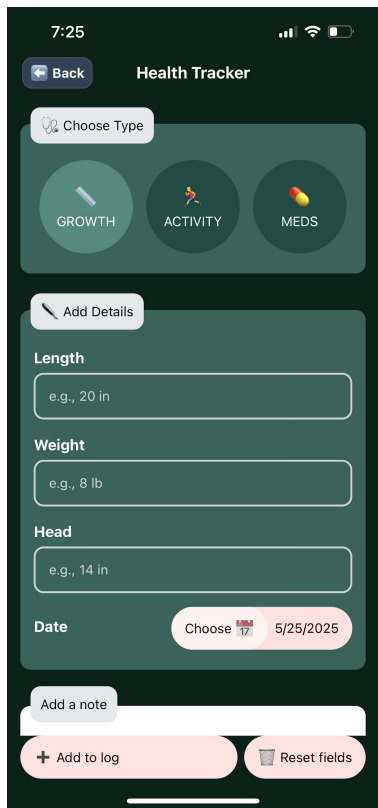

Editing/deleting logs:

You can now see that the log shows the new information that we added when editing.

Health Tracker

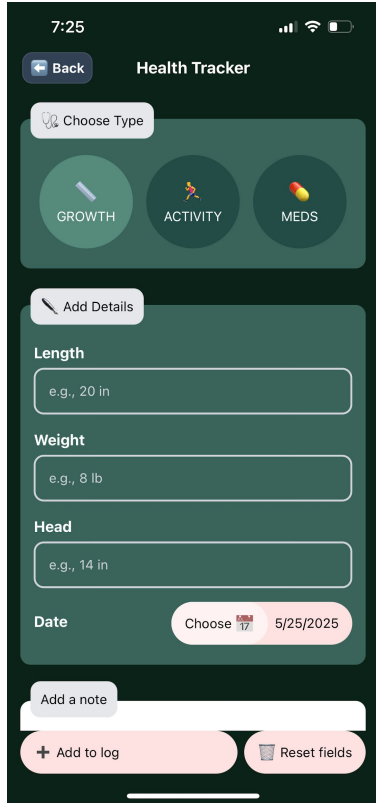

HealthTracker:

The screenshot shows the HealthTracker app interface on a mobile device. At the top, the status bar displays the time 7:25, signal strength, Wi-Fi, and battery icons. The app's title bar shows a 'Back' button and the title 'Health Tracker'. Below the title bar is a 'Choose Type' button with a plus icon. There are three circular buttons: 'GROWTH' with a syringe icon, 'ACTIVITY' with a person running icon, and 'MEDS' with a pill icon. Below these is an 'Add Details' button with a pencil icon. The form has three input fields: 'Length' with a placeholder 'e.g., 20 in', 'Weight' with a placeholder 'e.g., 8 lb', and 'Head' with a placeholder 'e.g., 14 in'. Below these is a 'Date' label and a date picker showing 'Choose 17 5/25/2025'. At the bottom, there is an 'Add a note' button, a '+ Add to log' button, and a 'Reset fields' button with a trash icon.

After clicking on the health feature button you will be brought to the health screen.

Health Tracker:

The screenshot shows a mobile application interface for a 'Health Tracker'. At the top, the status bar displays the time '7:25' and signal icons. Below this is a dark green header with a 'Back' button and the title 'Health Tracker'. A 'Choose Type' button is positioned above three circular icons: 'GROWTH' (with a syringe icon), 'ACTIVITY' (with a person running icon), and 'MEDS' (with a pill icon). Below these icons is an 'Add Details' button. The main form area contains three text input fields labeled 'Length' (with placeholder 'e.g., 20 in'), 'Weight' (with placeholder 'e.g., 8 lb'), and 'Head' (with placeholder 'e.g., 14 in'). Below these fields is a 'Date' label and a date picker showing '5/25/2025'. At the bottom, there is an 'Add a note' text area and two buttons: '+ Add to log' and 'Reset fields'.

After clicking on the health feature button you will be brought to the health screen. You can see that there are there options on the top. Each one will give you different fields to fill so pick the one that fits the best.

HealthTracker:

The screenshot shows the HealthTracker app interface on a mobile device. At the top, the status bar displays the time 7:28, signal strength, Wi-Fi, and battery icons. The app's title bar includes a 'Back' button and the text 'Health Tracker'. Below the title bar is a 'Choose Type' button. Three circular buttons labeled 'GROWTH', 'ACTIVITY', and 'MEDS' are arranged horizontally. The 'ACTIVITY' button is highlighted. Below these buttons is an 'Add Details' button. The 'Type' field contains the text 'e.g., tummy time'. The 'Duration' field contains the text 'e.g., 30 min'. The 'Date' field shows a date picker with '5/25/2025' selected. Below the date field is an 'Add a note' button. The note field contains the text 'i.e. enjoyed tummy time'. At the bottom, there are two buttons: '+ Add to log' and 'Reset fields'.

You can that since the activity button was clicked it changed the fields. From this point it works the same as the other tracking features which can be seen in the second section.
